Re: Signatures on Certified Mill Test Reports

It is not Nucor-Yamato Steel's policy to have someone signing the Certified Mill Test Reports (CMTR) that we provide to our customers. According to ASTM A6/A6M, which is the specification that all Nucor-Yamato Steel's products are produced to, a signature is not required. The specification states in section 14.6 as follows, "A signature is not required on the test report; however, the document shall clearly identify the organization submitting the report. Notwithstanding the absence of a signature, the organization submitting the report is responsible for the content of the report."

Nucor-Yamato Steel does, however, put a scanned Quality Assurance representative's signature at the bottom of the CMTRs that are sent by mail and a typed Quality Assurance representative's name at the bottom of the CMTRs that are sent by facsimile or electronic mail.

We trust this information will answer your questions regarding signatures on CMTRs provided by Nucor-Yamato Steel. If we can be of any further assistance, please feel free to contact us.
