Making Steel for our Customers while maintaining environmental integrity

January 2023

Dear Nucor Customer:

Re: SDS Supplier Notification for
EPCRA and OSHA regulations

Please be advised that pursuant to Section 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA) we are providing you with notification that our products may contain reportable chemicals listed under EPCRA Section 313. The enclosed SDS lists each of the reportable chemicals that may be contained in the products available to you.

This SDS is also being provided to you to meet requirements of the Occupational Safety and Health Administration's (OSHA) Hazard Communication Standard (29 CFR 1910.1200) which requires manufacturers to supply their customers with SDS's for certain products. The SDS contains vital information relative to the product's safe handling. Please ensure that all persons handling this product have ready access to the information contained in this SDS and are familiar with its contents.

If you are unsure whether you are subject to the reporting requirements of EPCRA Section 313, or need more information, call EPA's EPCRA department. Please note that if you process, repack or otherwise redistribute this product to industrial customers, a notice similar to this one, must be sent to those customers.

Sincerely,

Kylee Clanton,
EHS Department Manager
Nucor-Yamato Steel

Being Environmental Stewards in the Communities of which we live and work.
